上海大学

Shanghai University

### Our strategic partners in Japan:

**RICOH**  
imagine. change.

**TOPPAN**

**FANCL**

**meiji**

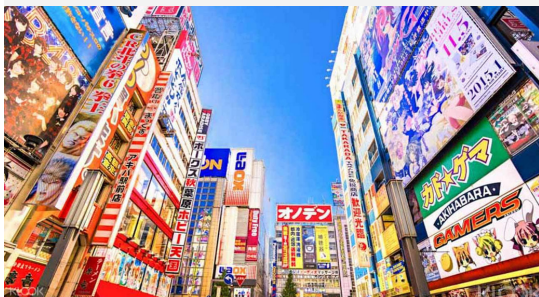

ヤマト運輸

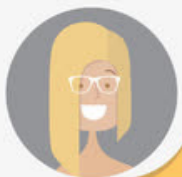

**HONDA**

# Introduction to the Programme

- Grab the learning opportunity beyond the classrooms.
- Explore Japanese industries and cultures in-depth through comprehensive schedules including exchange sessions with universities and visiting sessions with enterprises, hence broaden students' horizon to better know themselves, and at the same time allow them to make the first step on career planning for the near future.
- Discover top universities in Tokyo, not merely a simple campus tour, but also a chance to walk into lectures, libraries, sports facilities and student canteens. Precious chance to have a face-to-face communication with university students and exchange students in Japan and experience the learning atmosphere in Japan.
- Visit famous Japanese companies and walk into the real working environment in Japan. Students may see the working attitude of Japanese employees and learn the latest progress in different areas, including technology, environmental protection, transportation, etc.
- Each project could be tailor-made upon the requests of schools and students. Focusing on specific areas, such as STEM, Humanities, General Education, Arts, Physical Education and Cross-Cultural Communication, and supplemented by travel and sightseeing, students can get to respect and learn Japanese cultures from all perspectives.

While visiting OJI Holdings, we got to meet an alumni working there. She shared her working experience in Japan and we learnt a lot in the limited discussion session.

Year 3 student @ the University of Hong Kong

The visit to Ricoh Japan is more than expectation. We walked into the actual workplace of employees and experienced the differences of working environment between Hong Kong and Japan. It is also amazing seeing how Ricoh Japan improved work efficiency by changing its working environment.

Year 2 student @ City University of Hong Kong

One week's schedule is really short. I really appreciated the chance to communicate with students from Rikkyo University and my leadership skills did improved after the programme. I will definitely join again if I can enroll in the same programme next year.

Year 3 student @ Shanghai University

International culture exchange with Japanese students from Tokai University is one of the most meaningful parts throughout the programme. As an Engineering student, I also felt the visit to Honda Factory very impressive. We got to see the whole production process of automobiles and the staffs there are passionate and patient to answer all our questions in the visit.

Year 1 student @ National Taiwan University

## Students' Feedback

Taiwan Joint Universities  
Culture Exchange Tour 2019  
Visiting Session (Waseda University)
